Summary

Frontend Web Developer and fresher with strong knowledge of HTML, CSS, JavaScript, React.js, Redux Toolkit, and Tailwind CSS. Skilled in building responsive and user-friendly web applications with clean and reusable code. Developed multiple real-world frontend projects including e-commerce and fitness platforms using React and REST APIs. Passionate about learning modern web technologies and contributing to dynamic development teams.

Education

Bachelor of Business Administration (BBA) Maharishi Dayanand University, Rohtak	2018 – 2021
Full Stack Web Development Course AccioJob	2024 – 2025

Technical Skills

- **Languages:** HTML5, CSS3, JavaScript
- **Frontend:** React.js, Redux Toolkit, Tailwind CSS, React Router DOM
- **Backend/Services:** REST APIs, Authentication, Local Storage
- **Tools:** Git, GitHub, VS Code, Postman, Vercel
- **Problem Solving:** Solved 500+ JS problems on AccioJob

Projects

Shoppic - E-Commerce Web App	Live Demo
• Developed a fully responsive e-commerce frontend using React.js and Tailwind CSS with a modern mobile-first UI. • Implemented dynamic product listing using reusable React components and integrated REST APIs for fetching product data. • Built signup and login interfaces with form validation and smooth user interactions. • Developed a fully functional shopping cart with add-to-cart, quantity update, and total price calculation features using Redux Toolkit. • Used localStorage for persistent cart and authentication state management. • Created dynamic product detail pages using React Router DOM for seamless navigation. • Improved overall user experience with responsive layouts, hover effects, smooth scrolling, and clean UI design.	
FitZone - Fitness Web Application	Live Demo
• Built a fitness web application using React.js with reusable and modular components. • Designed and developed a BMI calculator to help users track fitness progress in real-time. • Added body transformation plans including workout schedules and meal plans for weight gain and weight loss goals. • Developed a supplements section with simulated product purchase functionality. • Created a categorized exercise library with dynamic routing for different muscle groups such as Chest, Back, Legs, and Arms. • Implemented responsive UI design to ensure compatibility across desktop, tablet, and mobile devices.	

Certifications & Achievements

- Completed Frontend Web Development training from AccioJob.
- Solved 500+ problems on AccioJob platform.
- Built and deployed multiple React.js projects on Vercel.
